Live.jpg (57.95 KiB) Viewed 147 times gallery: 1 (3.84 MiB) Posted August 11, 2008 02:16 pmQ: Building Qt-SDK fails in Ubuntu 15.10 with `libQt5Widgets.so.5: cannot open shared object file: No such file or directory` Recently I installed Qt-SDK for Ubuntu (I'm using Ubuntu 15.10). I followed the instructions provided here: It took me 2 hours to compile and link the "Desktop Test Application" (which has 'Hello World' written on it) which I successfully built on my laptop (which is Ubuntu 14.04). On my desktop (Ubuntu 15.10) it fails. When I ran./qmake-gui I got these errors: paul@paul-desktop:/opt/Qt-SDK/qtcreator-2.6.0/src$./qmake-gui ...some output (I can't post it due to my low reputation)... paul@paul-desktop:/opt/Qt-SDK/qtcreator-2.6.0/src$ make ar lib/QtCore/5.4.0/uic/uic.o ar lib/QtGui/5.4.0/uic/uic.o ar lib/QtNetwork/5.4.0/uic/uic.o ar lib/QtWidgets/5.4.0/uic/uic.o ar lib/QtSql/5.4.0/uic/uic.o ld -Xlinker --no-undefined -o../../../bin/qmake-gui.elf../../bin/uic.o

lib/QtCore/5.4.0/uic/uic.o ld -Xlinker --no-undefined -o../../../bin/qmake 82157476af
